kavyahyadav10@gmail.com

ABOUT ME

Final-year B.Tech Artificial Intelligence and Machine Learning student with hands-on experience building AI-powered and full-stack applications. Skilled in Python, Machine Learning, Deep Learning, Generative AI, LLM-based applications, embeddings, semantic search, FastAPI and MongoDB. Experienced in developing AI solutions and integrating machine learning capabilities into production-oriented applications. Seeking GenAI, LLM, AI Engineering or ML internship opportunities.

EDUCATION

LJ University, Ahmedabad

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Machine Learning

2023-2027 | CGPA: 7.12/10

PROJECTS

AgencyBrain AI — AI-Powered Marketing Intelligence Platform

[Python](#) | [FastAPI](#) | [React.js](#) | [MongoDB](#) | [Scikit-learn](#) | [Sentence Transformers](#) | [NLP](#)

- Developed a full-stack AI-powered marketing intelligence platform for digital agencies, combining NLP/ML techniques with automated marketing analysis.
- Built AI modules for SEO analysis, content optimization, keyword intelligence, and competitor comparison, including TF-IDF extraction, semantic clustering and search-intent analysis.
- Developed scalable FastAPI REST APIs with JWT authentication and integrated MongoDB Atlas using the asynchronous Motor driver.
- Implemented automated client-ready PDF report generation and an interactive React dashboard for analytics and activity monitoring.

Online Shopping Platform

[C#](#) | [.NET 8](#) | [ASP.NET Core Web API](#) | [Entity Framework Core](#) | [Angular](#) | [Swagger](#)

- Developed a .NET 8 ASP.NET Core Web API for managing products in an online shopping platform.
- Implemented RESTful GET and POST product APIs using ASP.NET Core controllers and Entity Framework Core.
- Configured an in-memory database with Entity Framework Core for product data management and integrated Swagger/OpenAPI for API testing and documentation.
- Created an Angular-based sample product listing interface with product details and cart interaction UI

EcoCart / FarmKart — E-Commerce Platform

[Django](#) | [Python](#) | [Tailwind CSS](#) | [SQLite](#)

- Developed a full-stack agricultural e-commerce platform connecting farmers directly with customers for purchasing fresh produce.
- Implemented core e-commerce functionality including product listings, shopping cart, payment processing, and order tracking.
- Built responsive user interfaces using Tailwind CSS and structured the application with Django modules for accounts, products, categories, carts, and orders.
- Integrated SQLite for lightweight and efficient application data management.

SKILLS

- **Languages:** Python, JavaScript, C++, SQL, HTML, CSS
- **AI/ML:** Machine Learning, Deep Learning, NLP, Scikit-learn, Sentence Transformers, TensorFlow, PyTorch, NumPy, Pandas, SciPy, NLTK, spaCy
- **Frameworks:** FastAPI, Django, React.js, Vite, Node.js, Express.js
- **Databases:** MongoDB, MongoDB Atlas, SQLite
- **Web Technologies:** REST APIs, Tailwind CSS, Bootstrap
- **Document & Data Processing:** ReportLab, PyMuPDF, PDFPlumber, BeautifulSoup, Requests
- **Tools:** Git, GitHub, VS Code, Postman, npm

CERTIFICATIONS

- IBM – Exploratory Data Analysis for Machine Learning, Introduction to HTML, CSS & JavaScript
- University of Pennsylvania – Inheritance and Data Structures in Java
- LearnQuest – Introduction to Java
- IBM - Exploratory Data Analysis for Machine Learning
- Microsoft - Back-End Development with .NET
